

CDM Regulations 2015 E-Learning

The CDM Regulations 2015 online course has been designed to quickly and confidently increase your CDM Regs knowledge in the shortest possible time.

CDM Regulations 2015 Online

Course Overview

Our CDM Regulations Online Training covers everything you need to know about planning, managing, and maintaining everyone's safety throughout a construction project. This course gives you a step-by-step guide towards compliance with current legislation.

Who is the course for?

Our course is designed for professionals in construction, civil engineering, utilities and property management who need to quickly understand and fulfill their legal responsibilities

Benefits for Employers

- Guard against legal action, financial penalties, and damage to property.
- Ensure your staff are protected from serious injuries and health problems.
- Show your dedication to outstanding health and safety standards and enhance your reputation.

Benefits for Learners

Our online CDM 2015 course is also designed as a fast reference point, to quickly and easily find the information you need. By the end of the course you'll be able to:

- Protect yourself and your company against prosecution by meeting your legal responsibilities.
- Maintain a safe workplace for you and your colleagues.
- Enhance your employability with essential, industry-specific knowledge.

Learning Outcomes

- Explain and Understand the CDM Regulations
- Identify how to Plan Projects Effectively
- Identify how to Maintain a Safe Construction Site

Course Key Highlights

- **Duration: 1-2 hours online. This course is split into four modules:**
- **Introduction to CDM 2015 and interpretation of scope and application**
- **The specific and practical interactive duties of planning, managing and coordinating between the six key duty holders.**
- **Project Planning:**
 - Clients Brief
 - Pre-Qualification Questionnaire
 - Pre-Construction Information
 - HSE F10 Notification
 - Construction Phase Plan
 - Health & Safety File
- **Overview of the general health and safety requirements for all construction sites.**
- **Specific CDM Project Scenarios showcasing what needs to happen and when.**
- **Assessment: There is an online multiple-choice test at the end of the course. Learners will receive an online certificate upon successful completion.**
